Designed to address the intermittency of renewables like wind and solar, this innovative system uses liquefied natural gas (LNG) as a buffer to stabilize power supply during peak demand. Let's explore ...

OSLO, Feb 5 (Reuters) - Norway's parliament on Thursday rejected a proposal to block Equinor's plan to supply electricity to its Hammerfest liquefied natural gas (LNG) plant from the ...

Consistent with the Energy Storage Deployment Order, the goal of this study is to complete an initial analysis of how many MW of peaking units could be replaced or hybridized with energy storage and ...

Northern Lights is a partnership between Equinor, Shell and Total, and is a key component of Longship, the Norwegian Government's full-scale carbon capture and storage project, which aims to capture ...

Peak Energy, a U.S.-based company developing low-cost, giga-scale energy storage technology for the grid, announced it has secured its \$55M Series A Peak Energy on Track to Rapidly Scale Sodium ...

Norway's capital, Oslo, has emerged as a global leader in renewable energy adoption. With ambitious goals to reduce carbon emissions by 55% by 2030, the city's energy storage project bidding process ...

Aker BP and OMV (Norge) AS have entered, as Poseidon partners, into a collaboration agreement with H&#246;egh LNG to provide the marine CO<sub>2</sub> infrastructure required to collect, aggregate, ...

The project is focused on the development and performance optimization for next-gen HPWH with embedded energy storage solution. Unlike centralized megawatt-scale solutions, embedded systems ...

Let's cut to the chase: Oslo builds largest energy storage station, and it's not just another infrastructure project. This 1.2 GWh behemoth, set to power 180,000 homes during peak demand, is ...
