Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The oversupply that helped to push prices down last year has eased a...

According to Yana Hryshko, head of Solar Supply Chain Research at Wood Mackenzie, prices for Tier 1 solar modules could increase to \$0.14 to \$0.15 per watt by the end of 2025. This shift ...

Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. This isn't a temporary blip. It ...

Solar module prices are expected to increase significantly from current levels in the next six months, according to Yana Hryshko, head of Solar Supply Chain Research for Wood Mackenzie.

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with latest data.

Over the past two weeks, multiple industry analyses have confirmed a coordinated shift -- PV panel prices are rising, and the drivers behind this change are structural, not temporary.

High-quality solar module prices are expected to range between \$0.12/W and \$0.15/W by the end of 2025, depending on the technology used. This reflects a new balance between global ...

The impact is already being felt across the market, with experts forecasting a 10-15% increase in panel prices, tightening supply chains and triggering pre-buying worldwide.

Q3 2025 prices rose 1.22% to \$0.083/W, with higher indications from \$0.080-0.087/W. Prices for Q4 2025 loading cargoes climbed 1.23%.

Hryshko emphasized that solar module prices are likely to rise significantly in the coming months. "Prices

PV panel prices expected to rise

must increase, as the manufacturing sector is determined to make it happen," she ...
