The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

Committed to Restoring America's Energy Dominance.

Since 2020, DOE's Energy Information Agency has hosted an interactive database with coordinates of the central point of large-scale solar facilities.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) electricity output ...

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download geospatial data on solar ...

To make this landscape easier to explore, I've developed an interactive geographic distribution map that integrates every announced project from 2025 through 2030 collected by the U.S. Energy Information ...

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar Atlas provides a ...

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, including ...

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity

Photovoltaic energy storage project distribution map

(MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP facilities.
