-----  
What is lithium & battery tech ETF (lit)?

LIT invests in companies throughout the lithium cycle, including mining, refinement and battery production, cutting across traditional sector and geographic definitions. The Global X Lithium & Battery Tech ETF (LIT) invests in the full lithium cycle, from mining and refining the metal, through battery production.

What is a battery ETF?

The ETF expands beyond just batteries to encompass more aspects of the renewable energy space. Another ETF with a focus on everything from batteries to solar power to electric vehicles. A top high-risk, high-reward bet on innovative companies, including stocks in the battery tech industry.

Should you invest in a lithium battery ETF?

An ETF focused on lithium battery tech will provide diversification across the industry. For example, ETFs might hold lithium mining companies, battery manufacturers, EV automakers that integrate the tech into a vehicle, and more. Unfortunately, since this is such a young industry, there are few choices for ETF pure plays in the industry.

What is the Global X lithium & battery tech ETF (lit)?

The Global X Lithium & Battery Tech ETF (LIT) seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive Global Lithium Index. Performance is shown on a total return basis (i.e., with gross income reinvested, where applicable).
