---

the National Electrical Code, and Underwriters Laboratories product safety standards [such as UL 1703 (PV modules) and UL 1741 (Inverters)], which are design requirements and testing ...

The reinstallation of the PV modules, PV support system (racking) and associated equipment and wiring must comply with the requirements of the currently adopted NEC, including but not limited to all ...

The international standards for photovoltaic (PV) module safety qualification, IEC 61730 series (61730-1 and 61730-2), were recently updated to reflect changes in PV module technologies. ...

The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These lists provide information and data that ...

The goal of this guide is to reduce the cost and improve the effectiveness of operations and maintenance (O&M) for photovoltaic (PV) systems and combined PV and energy storage systems.

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing ...

Metallic support structures listed, labeled, and identified for bonding and grounding metal parts of PV systems can be used to bond PV equipment to the metal support structure.

Learn more about using NFPA codes and standards to ensure safer energy storage and photovoltaic system installations.

Explore NEC 2023 Article 690.4 requirements for solar PV systems: equipment listing, qualified personnel, floating PV systems, and compliance standards.

# Photovoltaic support equipment requirements and standards

The following sections list the applicable code and standard requirements and details helpful for Plan Review. The Field Inspection section then provides details for inspecting "... photovoltaic systems."
