Hyperion Renewables, a company with nearly two decades of experience in the development, financing, and operation of large-scale renewable projects, has begun construction of ...

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility ...

These systems represent a significant milestone in the integration of solar generation and storage, bringing Portugal closer to the energy model that will define the next decade: a smart ...

Summary: Portugal is accelerating its transition to renewable energy with groundbreaking storage technologies under the "Portugal 2030" initiative. This article explores cutting-edge solutions, ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Portugal's heavy reliance on renewables, particularly solar and wind, makes BESS essential for a stable energy supply. These systems act as a critical buffer, providing backup power ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into ...

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and frequency ...

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone

Portugal s new energy storage system

batteries and hybrid (co-located) systems with renewable plants.
