-----

It's not hard to see why there has been a mad rush to roll out a veritable carpet of solar panels across the region, along with other green energy power generation plants: Qinghai boasts ...

A photovoltaic project with a power generation capacity of 900 megawatts (MW) went into operation on Sunday in northwest China's Qinghai Province.

In 2013, Huawei and Huanghe deployed string inverters in the Golmud PV power station in Qinghai, marking the first time string inverters were installed in a large-scale, ground-mounted PV plant. This ...

Serving power demand in other parts of the country, the project is representative of the thriving clean energy sector in Qinghai, which is home to the headwaters of the Yangtze, Yellow and ...

Ten years ago, central inverters were still the mainstream power generation solution throughout China. However, Huawei joined forces with Huanghe Company in 2013 to launch the first ...

Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, simultaneously generating ...

At 19:58 on April 29, the first 100 - megawatt solar thermal power generation project in Qinghai led by Northwest Engineering Corporation Limited, the CTGR Qingyu DC Phase II 100 - MW Solar Thermal ...

Hainan Tibetan Autonomous Prefecture is rich in solar energy resources, and the Talatan Gobi Desert offers ideal conditions for developing solar and wind power.
