Comprehensive data on renewable energy by country, providing insights into global efforts toward sustainable energy and highlighting leading nations in using the largest percentage of renewable energy.

In 2030, renewable energy sources are used for 46% of global electricity generation, with wind and solar PV together making up 30%. By 2030, however, solar PV becomes the foremost renewable electricity source, ...

Yet even with this significant growth in renewable and other zero-emission capacity, the world is still burning, and increasing its use of, fossil fuels. Geopolitical turmoil and volatile markets are disrupting ...

Where is Renewable Energy Used Around the World? The global energy map is changing fast and renewables now supply a significant and rising share of the ...

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for 2022-2023.

In this article we look at the data on renewable energy technologies across the world; what share of energy they account for today, and how quickly this is changing.

Derived from natural resources that are abundant and continuously replenished, renewable energy is key to a safer, cleaner, and sustainable world. Explore common sources of renewable energy...

Where is Renewable Energy Used Around the World? The global energy map is changing fast and renewables now supply a significant and rising share of the world's electricity.

The world reached a new milestone as low-carbon sources - renewables and nuclear - provided 40.9% of the world's electricity generation in 2024, passing the 40% mark for the first time since the 1940s, according to ...

A new United Nations special report highlights how far the world has come in renewable energy since the

Renewable energy in the world

Paris Agreement on Climate Change in 2015 sparked a clean energy revolution.

Wind energy followed, adding 117 GW globally. Other renewable sources - whether for power, heat or transport fuels - accounted for only small additions to the global energy supply. China was the ...
