Until two years ago, Ms Haagi would not have been able to provide such necessities to her family. Like most of rural India, her village suffered from frequent unplanned power cuts, meaning ...

India is making significant strides in renewable energy, and leading this revolution is the quaint village of Modhera in Gujarat, which has etched its name in history as the first solar-powered ...

Rural communities, often facing challenges in accessing reliable energy sources, have particularly benefited from solar energy initiatives. Solar energy refers to the radiant light and heat ...

The Solar powered village will have over 1000 solar panels, that have been installed on the village houses, generating electricity round the clock for the villagers to provide solar electricity at ...

While metros chase sustainability in glossy high-rises, real impact is unfolding in India's villages, where people are using the sun to reclaim control over their lives. Here are five real stories ...

Gram Oorja began with a simple idea from Sameer Nair, Anshuman Lath, and Prasad Kulkarni: reliable electricity should reach even the most remote villages. Today, that idea lights up 150 villages across ...

With the vision of powering the Sun Temple and the entire village through Sun God (solar energy), this project is the first of its kind, where rural residents are envisaged to be...

At the Solar Village Project, we believe every community deserves access to clean, reliable energy. Together, we can transform lives, protect the environment, and fight energy poverty ...

In the heart of Bihar, India, lies the small village of Dharnai, a place that, for decades, had lived without reliable electricity. With a population of around 2,400, the villagers depended on...

Rural villagers invented solar power generation

By 2000, more than 400,000 people in villages around the Sundarbans national park were using solar power, through a mix of mini-grids and domestic solar-power systems.
