The following ten vehicles feature solar panels, enabling them to gain range simply by being parked outdoors. Though solar charging rates are slow, the long-term savings and ...

Aptera is a fully electric, solar-powered vehicle engineered for maximum efficiency and range s lightweight, ultra-aerodynamic design dramatically reduces energy consumption, allowing it ...

Numerous solar-powered car prototypes are currently in development, with some already being produced. In this blog, we'll see some of the top electric vehicles with solar roofs.

We design for independence and convenience. We create solar charging systems for electric vehicles that can drive off-grid and into all of life's adventures.

Solar-powered electric cars sound like a perfect solution, but how viable are they now, and when might your car get a top-up just by sitting outside?

The Stella Terra off-road SUV was created by students at Eindhoven University of Technology, and powered entirely by the solar panels on its roof.

Now, the solar vehicles have completed the first stage of the cross-country Electrek American Solar Challenge (ASC). Here are the results and how you can track the team's locations in ...

In a world facing climate change and energy crises, Stella Terra offers a glimpse into a future where vehicles are not just electric, but fully self-sustaining--powered entirely by the limitless ...

Harness the power of the sun with Aptera. Designed with ~700 watts of integrated solar cells, drive up to 40 miles per day completely off the grid and enjoy 400 miles of range per full charge.

Engineering students from Eindhoven University of Technology have achieved a groundbreaking feat by

SUV powered by solar energy

designing and successfully test-driving Stella Terra, the world's first fully solar ...
