---

Under ideal conditions, single glass can be slightly more efficient. However, double glass often wins in real-world scenarios due to their bifacial design and better durability.

QUANTUM is a China-based global supplier of PVB, PDLC, TPU, EVA and other functional plastic thin films. It also distributes ultra-clear patterned solar glass as well as solar PV modules globally.

Despite their robustness in use, glass-glass modules can be more sensitive to mechanical impacts during transportation or storage, as glass is less flexible and can break under strong pressure.

Raytech as a manufacturer and supplier of high-quality double glass solar panel, solar module, and solar panel, provide you with high-quality products and solar module customization service.

The application of double-glass modules covers multiple markets including utility, residential and commercial. To learn more, complete the form below to download the white paper.

Generally, the front and back glass layers in these modules have the same thickness, contributing to their balanced structural integrity. This design not only enhances the module's ...

Among the current module products on the market, only single-glass modules are equipped with tempered glass. The choice of front and shear materials is critical in determining the ...

Compared to traditional single glass modules, double glass modules offer significant advantages, particularly in terms of efficiency and durability. The rear glass layer can absorb reflected light, ...

This is based on the increase in market share of bifacial modules as well as an increase in utility-scale PV installation, which prefer more durable module designs such as glass-glass.
