What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

How much does a solar project cost in Vietnam?

Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low. In January 2023, the top rate was NT\$1.49/kWh for ground-mounted solar and NT\$1.89/kWh for floating solar, with no regional or storage-based distinctions.

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy Corporation, noted that the new scheme supports the adoption of storage and provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.

Explore Vietnam's growing demand for solar battery storage across residential and commercial sectors. From home backup systems to large-scale BESS battery energy storage, GSL ...

Vietnam greenlights two new solar power plants and two large-scale battery storage systems (BESS) in its northern provinces to advance its renewable energy goals.

The 2025 Electricity Law officially recognizes BESS (Basic Energy Storage and Emitter System) as part of Vietnam's national power infrastructure. In April, Decision 988/QD-BCT issued a ...

Solar Energy Storage in Vietnam

Batteries energy storage systems (BESS) are becoming a common trend worldwide supporting an increase in the power system's renewable energy (RE). Storing energy is not applied ...

Last week, our Managing Director Thomas Jakobsen joined two high-level panels at the annual Solar & Storage Live Vietnam 2025, sharing practical insights into Vietnam's energy sector ...

In the context of energy transition and Vietnam's commitment to reducing greenhouse gas emissions, the Government has introduced a series of policies and support programs to promote the application ...

- The 5th Vietnam Clean Energy Forum, themed "Policy and technology solutions to Promote Energy Storage Systems and Industry parks" Solar power in Vietnam," was successfully ...

Households in Vietnam could receive up to VND 3 million (\$113.9) in investment capital for home solar-plus-storage systems installed for self-consumption, or a preferential loan of up to ...

Vietnam's solar energy sector is booming, and energy storage solutions are the key to unlocking its full potential. This article explores the latest trends, applications, and benefits of solar energy storage ...
