Who is solar land agent?

Solar Land Agent, LLC has built a reputation for integrity and confidentiality in representing our clients and is excited to be part of the growing renewable industry. We are here to help landowners understand the procedures, timing, and financial arrangements for their new venture into renewable energy.

Why do we need solar energy?

As energy consumption continues to increase, there is growing demand from across our communities, industries and governments to decarbonise global economies. As a preferred mainstream energy source for many markets, solar is playing a major role.

What is site selection & characterisation for solar projects?

Site selection and characterisation for solar projects requires an ideal balance to be struck between existing environments and land/ocean uses, energy potential, geotechnical conditions, installation and maintenance considerations, and the ease of connection to transmission infrastructure.

What does a solar consultant do?

Offering specialist technical, operational and commercial due diligence services and advice, we support strategic infrastructure investment in solar. Our consultants focus on key investor concerns including future investment requirements and plans (Capex), expected future operating costs (Opex) and potential areas of operational improvement.
