What is a solar battery backup system?

Solar battery backup guarantees a power source-- even during a grid service failure or natural disaster. When the grid goes down,a solar battery backup system automatically detects and transitions your solar system from grid power to backup power. Protect your home from outages with our solar battery backup kits. Shop What's in a kit? FAQ

How do solar battery kits work?

Solar battery kits give you everything you need to power your home and keep it running during a grid outage. When utility power is available, your solar panels generate electricity that can roll back your energy bill. If the power goes out, the system draws energy from the battery bank to keep your most important electrical loads running.

Should I buy a battery with my solar kit?

Purchasing a battery along with your solar kit offers a pathway to energy independence from your utility company,especially when they provide a meager buyback rate for surplus energy you send to the grid. With a battery storage system in place,excess solar energy can be stored instead of sold to the utility for low rates.

What are all-inclusive solar kits?

These all-inclusive solar kits are designed for simplicity,featuring everything you need for a seamless setup and installation. With high-performance lithium battery options and versatile connectivity options,our solar power systems can be connected to solar,wind,backup generator,or utility grid sources.
