What are solar panels & solar tiles?

Both solar panels and solar tiles include photovoltaic (PV) cells which capture energy from the sun so it can be converted into electricity, enabling you to power your home using more free, renewable energy, lower energy bills and reduce your reliance on energy suppliers and fossil fuels. [Get Free Solar Panel Quotes: Get quotes and compare prices.](#)

Should I replace my roof with solar tiles?

Firstly, if you don't want to replace your whole roof then solar tiles aren't the option for you. And, even if you are replacing your roof, not all homes are suitable for a solar roof as the pitch and angle must be ideal for the tiles; they cannot be angled and adjusted like traditional solar panels.

What is the difference between solar panels and solar tiles?

What's the Difference Between Solar Panels and Solar Tiles? Both solar panels and solar tiles include photovoltaic (PV) cells which capture energy from the sun so it can be converted into electricity, enabling you to power your home using more free, renewable energy, lower energy bills and reduce your reliance on energy suppliers and fossil fuels.

Are solar roof tiles a viable alternative to solar panels?

Solar panels are becoming a more and more common sight on UK homes as the technology becomes both more affordable and more effective at generating renewable energy. However, a newer technology known as solar roof tiles has been growing in popularity in the US as an alternative to panels, and the UK market looks set to go the same way.
