Can you put solar panels on a metal roof?

Pairing solar panels with your metal roof is a smart move, environmentally and financially. It's a bit like setting up a mini power plant on your roof -- one that's green, efficient, and can even make your neighbors a tad envious. Dive into our friendly guide on combining solar panels with metal roofs for an eco-savvy, energy-efficient home.

Can thin film solar be installed on a metal roof?

Thin-film solar can only be installed on certain types of roofs, and standing seam metal roofs are ideal surfaces for it. While regular panels offer higher efficiency per square foot, thin-film solar panels have a lower profile and are easier to install.

Are metal roofs good for solar?

They support both the live and dead-weight of solar installations with ease. Furthermore, many recently installed metal roofs include reflective paint mixtures that help keep temperatures down, increasing solar module efficiency.

Can you install solar on a corrugated metal roof?

The S-5! CorruBracket includes a factory-applied butyl sealant in its base, a suitable option for efficiency and ease of installation. However, it is crucial to check with the roof manufacturer's warranty before installing solar on a corrugated metal roof, as penetrations can sometimes void the warranty.
