Concentrating solar power (CSP) projects that are under construction are listed below alphabetically by project name.

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

From record-breaking solar farms switching online to multi-hundred-megawatt developments securing financing, this month underscored how utility-scale solar is leading the renewable energy charge. ...

Explore the top US utility-scale solar projects of 2024-2025. Learn how gigawatt-scale farms and integrated battery storage are powering America's energy future.

To combat this, renewable energy has to start replacing fossil fuels - not just adding to the supply. Around the world, enormous and ambitious renewable energy projects are operational and under ...

Each month, we track projects in development and update our list of the largest planned solar projects expected to come online in the US. As of February 2026, there are 4,155 planned solar projects in development in the ...

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, we cover the largest solar energy projects currently ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 gigawatts (GW) of ...

Solar power generation projects under construction

Here are some of the more prominent solar projects currently in development in Texas. From pre construction to nearing completion.
