-----

The project will be developed at Rome Fiumicino International airport and the energy stored will cover evening peak-demand, while also providing flexibility services to the grid.

Enel: Italy launches an innovative energy storage system at Rome's Fiumicino airport, utilizing old electric vehicle batteries to significantly reduce carbon emissions and store renewable ...

The storage system accumulates renewable energy to be used even when the sun is not out, and leverages used electric vehicle batteries, giving them a second life.

Europe's largest airport solar-battery integration, boosting energy resilience and circular economy leadership. Rome's Fiumicino International Airport has launched Pioneer, Europe's largest ...

Enel's Pioneer project is expected to last 10 to 15 years and has been integrated with Rome-Fiumicino airport's Solar Farm, self-consumption PV system. From ESS News. Italy's largest...

Traditional battery systems often struggle with Italy's diverse geography and aging grid infrastructure. Enter modular smart energy storage - compact, AI-optimized units that are redefining power ...

Rome's Fiumicino International Airport has become the first in Italy to deploy a large-scale energy storage system built entirely from used electric vehicle batteries, in a bid to accelerate its ...

Using Rome Airport as an example, the planned 2nd-life battery storage in combination with a PV system shows the way towards the goal of net-zero emissions in the local power supply. In addition, ...

The system is fully linked with Fiumicino's newly operational "Solar Farm," Europe's largest airport-based self-consumption photovoltaic installation, which began generating power in January ...

Explore renewable energy trends at the Solarplaza Summit in Rome. A leading solar and energy storage
