We're working to build a diverse, equitable and inclusive solar industry by providing pathways to technical careers for women\*, highlighting the voices of women of color in the industry, and providing national ...

It can feel overwhelming to enter a male-dominated space in the trades or be the only woman on a job site, so having a group of women who can learn together and work together after being hired can make ...

About 30% of solar's installation workforce is female, while just nearly 11% of the construction workforce is female - showing that solar is outpacing other male-dominated trades for women.

Solar for Women imagines a thriving network of women who work in solar as installers and technicians, and who desire to support other women and encourage girls to consider solar as a career.

As a still relatively young but rapidly evolving sector that is not subject to the inertia often seen in more traditional fields, the solar industry can offer unique opportunities for women to...

There are millions of solar jobs expected in the renewable energy sector in the next 10 years. Our programs address barriers for women entering the industry such as soft skills development, tool use and acquirement, ...

Fortunately, some companies recognize the problem and are now actively recruiting women, which means that now is a great time for women to pursue STEM-related opportunities in solar energy.

As a woman-owned business specializing in solar waste management, we're invested in the proliferation of solar projects and have experience in recruiting underrepresented groups to solar. One key ...

Another notable initiative bringing women into the industry is Solar Sister, a non-profit social enterprise covering sub-Saharan Africa that recruits and trains entrepreneurs to set up their own businesses ...

## Solar support system recruits female workers

My estimate is that 1-3% of field roles in the United States (solar installers, field technicians, etc.) are staffed by women. While 50% would be nice, I don't think it's realistic. So I want to suggest we ...
