What is a mountain wind power project in Southeast Asia?

The successful, safe, and efficient installation of all turbines sets a new technical standard for mountain wind power projects in Southeast Asia. Located in Sekong and Attapeu provinces in southern Laos, the Monsoon Wind Power Project is the country's first wind farm and the largest single wind power project in Southeast Asia.

Which country has the largest wind farm in Southeast Asia?

(Photo: Monsoon Wind Asia) Laos is set to launch its first wind farm, and the largest in Southeast Asia, by the end of the year, with all 133 turbines now fully installed. The 600-megawatt Monsoon Wind Project, valued at USD 950 million, spans 68,000 hectares across Dak Cheung district in Sekong province and Sanxay district in Attapeu Province.

Where is the monsoon wind power project located?

Located in Sekong and Attapeu provinces in southern Laos, the Monsoon Wind Power Project is the country's first wind farm and the largest single wind power project in Southeast Asia. It is also Asia's first cross-border power transmission new energy initiative.

How many wind turbines are installed in Laos?

POWERCHINA successfully installs all 133 turbines for the 600 MW Monsoon Wind Power Project in Laos, Southeast Asia's largest single wind farm. The project is set to strengthen Laos' renewable energy capacity and boost the regional economy.

Countries in mainland Southeast Asia have stark differences in renewable energy strategies, balancing them with ample but controversial hydropower and entrenched interests. While ...
