This article covers most troubleshooting scenarios and procedures that an end user will need when owning a portable gas-powered generator.

Discover common reasons your generator stalls and tips to keep it running smoothly in this expert troubleshooting guide.

Several issues can lead to a generator starting but not staying operational. Understanding these causes helps you troubleshoot effectively. Fuel problems frequently prevent a ...

Your generator was running fine, but now it shuts off and won't stay running. A generator starts and then dies due to an empty fuel tank, plugged fuel filter, dirty carburetor, clogged fuel line, bad gas cap, ...

The most common cause for generator shutting down after it starts is the clogged carburetor (with old, sticky fuel that was left inside for an extended period of time). This sticky substance will clog the ...

When the choke is turned off, the carburetor allows more airflow into the combustion chamber. If the air-to-fuel ratio is not correct when this takes place, then stalling will occur. This can be a fuel problem or ...

Power's out, lights are dim, and your set fires up only to quit a minute later. This guide lays out clear steps, quick tests, and fixes you can do with tools. Move the unit outdoors, at least 20 feet from doors ...

The most common cause for generator shutting down after it starts is the clogged carburetor (with old, sticky fuel that was left inside for an extended period of time). This sticky substance will clog the ...

When the power is out and you need to light things up in your house to calm your family down, the worst thing is a generator that keeps giving you false hope that it's going to run and promptly stalls, ...

## The gasoline generator will stall when the wind is turned off

Fuel problems are one of the most common reasons for generators shutting off. Gasoline degrades over time, causing varnish and gunk buildup in the carburetor and fuel lines. Old or ...

The whole point of a generator is to stay on when your power lines won't. So it's pretty frustrating when yours keeps shutting off. We'll help you diagnose the problem and get your backup ...
