SETO's Photovoltaics End-of-Life Action Plan outlines a five-year strategy to establish safe, responsible, and economic end-of-life practices.

Falling equipment costs coupled with increased demand for clean energy have led to a rapid rise in solar development over the past decade, a trend expected to continue.

To get ahead of this looming waste crisis, the Environmental Protection Agency announced in 2023 that it would craft a new rule to reclassify retired solar panels as "universal ...

Of these new policies, three states (Minnesota, Montana, and North Dakota) implemented statewide requirements, while the remaining two states (Illinois and Wyoming) ...

Utility-scale solar in the US is expected to quadruple to 240 GWdc by 2040 most of which is expected to be ground-mounted solar which will be subject to federal and state PV system ...

Planning and Preparation: Develop a detailed solar decommissioning plan that outlines the scope, timeline, and procedures for solar panel dismantling and related infrastructure.

Solar farm decommissioning is the systematic process of dismantling and removing solar energy systems once they reach the end of their operational life. This typically occurs after 20-25 ...

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...

Recent data shows cumulative end-of-life PV waste in the United States will likely reach between 0.17 and 1 million tons by 2030. These numbers highlight why we need proper ...

The latest plan for the forced removal of photovoltaic panels

Complete guide to solar panel decommissioning including state regulations, financial requirements, and material management. Plan compliant site closure.
