Are women bringing women into the solar industry?

Another notable initiative bringing women into the industry is Solar Sister, a non-profit social enterprise covering sub-Saharan Africa that recruits and trains entrepreneurs to set up their own businesses distributing solar products.

What challenges do women face in the solar industry?

IRENA's research highlights the main obstacles women face in the solar industry: namely, social and cultural norms around gender. This begins at an educational level.

What role do women play in the solar industry?

Women account for 40% of this workforce, nearly double that of the wind industry (21%), according to research from the International Renewable Energy Agency (IRENA). The solar sector has led by example in providing training and upskilling programmes, which continue to play a key role in bringing more women into the male-dominated energy arena. 1.

How many women are employed in the solar industry?

Most women (58%) in the industry are employed in administrative roles. In positions not related to science, technology, engineering and mathematics (STEM), they account for 38%, and for STEM roles 32%. Notably, women are prevalent in solar manufacturing (47%), followed by service providers and developers at 39% and 37%, respectively.

The present report evaluates the role of women in the solar PV industry using the largest sample of global responses on solar PV energy and gender gathered to date.

The underrepresentation of women in the PV industry needs to be addressed with a holistic approach from a cultural and educational perspective, motivating girls to pursue STEM ...

A recent IRENA report confirms the photovoltaic industry as a leader in gender equality and reaffirms the essential contribution to the sector by women. Women are playing an increasing ...

This report explores gender equity across the solar photovoltaic industry where women are not well

represented in the more technical positions. Tailored training opportunities are a ...

Women represent 40% of the global solar photovoltaic (PV) workforce, double the share in the wind industry and oil and gas sector. However, they are mainly in administrative and non-STEM ...

Recruiting women to the solar industry The solar PV industry employs 4.3 million people - women now account for 40% of this number, which has increased in the last few years from 28%. ...

As the industry shifts from "adulging" with basic solar to mature renewable ecosystems, mounting systems are becoming the make-or-break factor. And with pioneers like Photovoltaic Bracket Sister ...

The renewable energy industry is a much more diverse and inclusive sector than the traditional energy and fossil fuels sector. Thanks to its multidisciplinary dimension, solar employs ...

The solar industry ranks as the largest employer in the renewables sector, reaching 7.2 million positions worldwide in 2023 - almost half of the 16.2 million total. Women account for 40% of ...

We reviewed solar industry job data and spoke with women in the industry to understand gender inclusivity in solar.
