The United States also installed a record 1.6 GW of grid-scale energy storage in the first quarter of 2025, according to a report from the American Clean Power Association (ACP).

The U.S. energy storage market achieved a remarkable milestone in the first quarter (Q1) of 2025, adding over 2 GW across all segments, the highest for any Q1 on record.

The American Clean Power Association reported that the United States added a record 1,602-MW of battery storage capacity in the first quarter of 2025, equivalent to the energy generation ...

The U.S. energy storage market set a first-quarter record for capacity installed in Q1 2024, with 1,265 MW deployed across all segments. This marks the highest storage capacity ever ...

The report shows that the U.S. energy storage market added more than 2 GW across all segments in the first quarter this year, marking the highest Q1 on record. The utility-scale segment ...

HOUSTON/WASHINGTON, June 18, 2024 - The U.S. energy storage market set a first-quarter record for capacity installed in Q1 2024, with 1,265 megawatts (MW) deployed across all segments. This ...

U.S. energy storage capacity installations jumped 84% year-over-year in Q1 2024, marking the highest storage capacity installed in the United States in a first quarter, according to...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Of that total, battery energy storage system (BESS) capacity represents 1.6GW. ACP says more BESS capacity was connected in Q1 2025 than in any other first quarter on record.
