Residents and local restrictions are delaying and blocking renewable energy projects in the United States at an accelerated rate, according to a study from Columbia University.

Local governments across the U.S. are blocking new clean energy plants. See the best locations for wind and solar power, and where it's being stopped.

A nationwide analysis by USA TODAY shows local governments are banning green energy faster than they're building it. At least 15% of counties in the U.S. have effectively halted new ...

Federal agencies are delaying approvals for renewable energy projects on both federal land and private property at a time when electricity demand is going up.

Over just the past few years, more than 100 rural U.S. counties have banned or severely restricted utility-scale solar development, the paper said. Some new ordinances take a relatively ...

Residents and local restrictions are delaying and blocking renewable energy projects in the United States at an accelerated rate, according to a study ...

President Donald Trump said the U.S. will not approve wind or solar power projects. Trump has tightened federal permitting for renewables with Interior Secretary Doug Burgum now ...

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

Local opposition has proven to be a significant barrier to the rapid expansion of renewable energy facilities across the United States.

Starting with the direct tax implications of HR 1, this strategy of energy subtraction has undermined solar and

US restricts solar panels

storage projects across the country. The Department of Energy has cancelled...

The Trump Administration is waging an unprecedented, cross-agency campaign to restrict clean energy deployment. Between the upending of tax policy, new punitive, anti-solar ...
