EchoMax XPS-10C Transducer: High-frequency ultrasonic transducer designed for a wide variety of liquid and solid applications, for use with approved controllers. Includes integral ...

The primary switched power supply is designed for field bus applications transporting energy and data at the same time via a two-wire line. The power pack for the ASi supplies a completely removed ASi ...

We provide a wide variety of power supply solutions. From switched mode and industrial uninterruptible power supplies to transformers, every product is designed for reliability and dependable operation.

Power supplies serve as the backbone of any electronic system, providing the necessary energy to keep devices operational. The ASi selection of Power Supplies encompasses a variety of voltage outputs ...

ASi power supply units supply the connected devices with 30.5 V and feature integrated data decoupling to extract the modulated process data. A large selection of power supply units from 2.8 A to 8 A in ...

AS-i power supplies provide power to the connected modules, sensors and actuators. They provide high noise immunity and sufficient power reserves to reliably handle short current spikes.

Uninterruptible Power Supply (UPS) Systems are units designed to supply electrical power to external devices for a few minutes during a power outage, allowing either the device to safely shut down or ...

Power Supply CP-ASI/2.8 Primary switch mode power supply for AS-interface The CP-ASI power supply range is specifically designed with integrated data decoupling for the supply of AS-Interface systems. ...

Special power supplies with integrated data decoupling unit for use in ASi-3 only networks. Suitable for all Bihl+Wiedemann ASi-3 gate-ways and safety monitors.
