-----

Summary: Explore how Vienna's iconic pitched roofs are transforming into solar energy hubs. This article breaks down the benefits, challenges, and real-world applications of photovoltaic (PV) panel ...

Over 1,500 new solar power installations have gone online over the past six months, helping fulfil the needs of 57,500 households in Vienna. Vienna has already met its target for ...

According to Austria Solar, fossil fuels will be replaced by solar energy for heat production in the near future in Austria, with the potential for every second building in the country to be supplied with solar ...

Prospect Solar is proud to install solar panels in residential homes in Vienna. We understand that making such a big change to your home can feel confusing or overwhelming, but we are here to ...

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas.

How do you provide heat to a residential building with 295 apartments without gas and district heating? The fossil free city quarter Wientalterrassen in Vienna leads the way since 2023, with the apartments ...

With Austria's national climate action stalling, Vienna passed its own climate law. The city mandates solar panels on new buildings, heats homes with geothermal, and targets net-zero by ...

Vienna has implemented its photovoltaic initiative in record time: The target of 250 megawatt peak (MWp) solar power capacity was reached ten months earlier than planned.

In Vienna, having a solar panel on your own roof is becoming increasingly attractive--and often subsidized. But is it really worth it? Here comes the answer.
