Should a sunroom have a glazed ceiling?

If your sunroom has a glazed ceiling, as opposed to a solid design, do be sure to check it for drafts in the same way you would your doors and windows. When looking into how to prepare a house for cold weather, you should be aware that there are ways of drawing rising heat back down into the sunroom itself.

Does window film keep a sunroom warm?

Although often thought of as a method of preventing overheating in a sunroom, certain types of window film can actually help when it comes to keeping them warmer- and when you consider the cost of a sunroom, it makes sense to ensure you can use it as much as possible.

Can a sunroom overheat?

Sunrooms, sometimes also referred to as conservatories, solariums and garden rooms, are notoriously tricky spaces to get the temperature right in - often either overheating in the summer or feeling Arctic in the winter. Happily though, that needn't be the case.

Should you use thermal curtains in a sunroom?

While you might not want to block out all the light that your sunroom is designed to allow you to enjoy, as night falls, good quality, thick thermal curtains are the perfect way to keep snug and cozy.
