Daytime visual impact from the BESS site will be most apparent and it will most likely take a decade before any screening trees will lessen this. Night-time security lighting will shine directly in our ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, signaling a ...

Location Central west New South Wales, Australia. The facility will connect to the adjacent TransGrid Wellington substation, adjacent to the Central West Orana Renewable Energy Zone.

Wellington is being constructed at 6773 and 6909 Goolma Road, Wuuluman NSW 2820. The project site is situated within the Central-West Orana Renewable energy Zone (CWO REZ), in ...

Bulabul Battery (formerly known as Wellington BESS or Wellington Battery Energy Storage System) was named by the Binjang Clan of the Wiradjuri people in August 2025.

The site was selected as it is immediately adjacent to Essential Energy Wellington Town substation, and its zoning is highly appropriate for the BESS. The location also avoids the need for third-party ...

BESS stands for Battery Energy Storage System. It is a technology that allows energy from renewable sources (like solar or wind) or the electrical grid to be stored in batteries and released when needed.

The Bulabul Battery is located on Wiradjuri Country five kilometres north east of Wellington in the Dubbo Regional Council local Government area (LGA). The Bulabul Battery is adjacent to and will connect ...

The Wellington Battery Energy Storage System project consists of a grid-scale BESS with a total anticipated discharge capacity of 500MW and a storage capacity of 1,000MW hours. ...

Wellington Outdoor Communications Power BESS Location

New South Wales remains an investable state for large-scale energy storage facilities like the Wellington BESS and the Waratah Super Battery. Alongside these sites, more 1GWh+ projects ...
