Clyde Tombaugh was an American astronomer who discovered Pluto in 1930 after a systematic search for a ninth planet instigated by the predictions of other astronomers.

Less than thirteen months later, on February 18, 1930, Clyde found the tiny moving speck of light among the millions of stars he surveyed, and Lowell's Planet X had been discovered.

Dissociative identity disorder (DID) is a mental health condition where you have two or more separate personalities that control your behavior at different times.

Clyde W. Tombaugh is best known for his February 18, 1930, discovery of Pluto, at Lowell Observatory in Arizona.

Clyde Tombaugh discovered the dwarf planet Pluto in 1930. He also discovered a number of asteroids and minor planets, and he was one of the supporters of further research to better understand UFOs ...

It's characterized by the presence of two or more dissociated self states that have the ability to take executive control and are associated with some degree of personal amnesia. For more information, ...

Clyde Tombaugh was an American astronomer who discovered ...

In controlled studies, non-specialised treatment that did not address dissociative self-states did not substantially improve DID symptoms, though there may be improvement in patients' other conditions.

If you or someone you know is struggling with symptoms of DID or related trauma, seek help from a qualified mental health professional experienced in treating dissociative disorders. ...

On this date in 1930, Clyde Tombaugh, searching for a 9th planet, discovered Pluto. This opened the door to further exploration of the outer solar system.

What did clyde tombaugh discover

Dissociative identity disorder (DID), formerly known as multiple personality disorder, is a condition that involves the presence of two or more distinct identities.

DID often co-occurs with other emotional conditions, including posttraumatic stress disorder (PTSD), borderline personality disorder (BPD), and a number of other personality disorders, as well as ...

Severe and repetitive childhood trauma often causes dissociative identity disorder (DID). You can have multiple identities that function independently if you have DID.

During his fourteen years at the Lowell Observatory, Clyde Tombaugh discovered hundreds of variable stars and asteroids and two comets. While engaged in the search that yielded Pluto, he also found ...

If you have DID, you may find yourself doing things you wouldn't normally do, such as speeding, reckless driving, or stealing money from your employer or friend.

Clyde Tombaugh photographed 65% of the sky and spent thousands of hours examining photographs of the night sky. After ten months of very hard work, sometimes working through the night in an ...
