Incorporating code-compliant solar installation labeling into an engineering drawing is just as critical as every other component within the system design.

This is an introductory article on permit and safety requirements for signage and labeling for solar photovoltaic systems.

Labels must be visible after installation, appear on every separated section, use capitalized letters with a minimum height, and provide clear contrast (for example, white letters on a red background).

Get Solar Labels is the place to go if you need labels for a PV system. We provide high-quality engraved solar placards and permanent labels for systems built to withstand decades of ...

**SOLAR PV SYSTEMS** Extracted From Mike Holt's Illustrated Guide to Understanding NEC Article 690; Requirements for Solar Photovoltaic Systems

The National Electrical Code (NEC) provides the definitive standards, specifically in Article 690 for Photovoltaic (PV) Systems and Article 706 for Energy Storage Systems (ESS).

The labels shall be reflective, and all letters shall be capitalized and shall be a minimum height of 9.5 mm (3/8 in.) in white on a red background. PV power circuit labels shall appear on every section of ...

The NEC690 Building Inspector's Guide is a set of reference materials developed for Building Inspectors and AHJ Officials as it relates to Article 690, of the National Electrical Code (NEC 2014) for ...

Certain warning labels are essential for solar panel and inverter safety, including voltage, manufacturer, and grounding labels.

## What letters are posted on the photovoltaic panels

Learn solar panel safety labeling requirements that protect workers and support NEC compliance. See what labels are required for PV installations.
