Locker Materials and Design The most common materials are metal, plastic, and wood. The material selected can influence the locker's durability, cost, and appearance. Metal lockers are typically the ...

Hazardous materials storage is the compliant protection of dangerous and toxic chemicals. Chemical storage can be as small as a wooden cabinet or as large as a Conex box. ...

Metal Lockers Phenolic Lockers Wood Lockers Laminate Lockers Hdpe Plastic Lockers Laminate is one of the stronger materials in this list because it's proven itself to be more durable than metal and wood. It doesn't dent like metal or become water logged like wood. However, depending on their location, it can delaminate and become susceptible to a variety of wear and tear. In that case, maintenance and repairs can become costly.
